PROJECTS

Company Website Enhancement

Key Skill-

React, MySQL, Javascript, HTML, CSS, tailwind

Postpatra pvt.ltd

- The Company Website Enhancement project is a dynamic and cutting-edge initiative undertaken by our organization to revamp and elevate our online presence. This live project focuses on transforming our existing company website into a powerful and engaging platform that not only represents our brand accurately but also provides an exceptional user experience.

Student-Management-System

Key Skill- Javascript, HTML, CSS

Collage Project

- A Student Management System is a digital platform that helps educational institutions efficiently manage student data, including enrollment, attendance, and grades. It simplifies administrative tasks, provides a user-friendly interface for all stakeholders, and offers tools for generating reports and monitoring academic progress. This system enhances communication and organization within educational institutions, ultimately improving the overall learning experience.

Ecommerce Website

Key Skill- Angular, node.js, MySQL, Javascript, HTML, CSS

Online bookstore

- Develop a versatile Ecommerce Website to facilitate online shopping, featuring intuitive navigation and secure payment processing. This platform ensures a seamless user experience with responsive design and advanced product search and filtering capabilities. It also incorporates personalized product recommendations and efficient order management. The Ecommerce Website is designed to enhance sales and customer satisfaction through a comprehensive and user-centric online shopping solution.
